

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) An antenna, comprising:

a ground pattern; and

a planar element that is conductive and includes (i) an edge portion positioned away from the ground pattern, (ii) a feed point and (iii) a cut-out portion formed at the edge portion,

wherein said ground pattern and said planar element are juxtaposed with each other extending along opposite directions ~~respectively, respectively, and~~

said planar element has such a shape that a bottom side thereof is adjacent to the ground pattern, lateral sides thereof are provided vertically or substantially vertically to said bottom side and said cut-out portion is provided in a top side thereof.

2-6. (Canceled)

7. (Currently Amended) The antenna as set forth in ~~claim 6,~~claim 1, wherein both corners of said bottom side are splayed.

8-10. (Canceled)

11. (Currently Amended) An antenna dielectric substrate, comprising:

a layer formed of a dielectric material; and

a layer containing a conductor having a cut-out portion formed from an edge portion nearest to a first side surface of said antenna dielectric substrate toward a second side surface opposite to said first side ~~surface,~~surface,

wherein said conductor has such a shape that a side thereof nearest to said second side surface is a bottom side, lateral sides thereof are provided vertically or

substantially vertically to said bottom side and said cut-out portion is provided in a top side nearest to said first side surface.

12-14. (Canceled)

15. (Currently Amended) The antenna dielectric substrate as set forth in ~~claim~~
~~14,~~claim 11, wherein both corners of said bottom side are splayed.

16. (Canceled)
